

New Curiosity-Driven Social Teasers for Strolid

Authority-building. Relationship-centric. Clear about who Strolid is and why dealers should pay attention.

★ 1.

On Strolid's Core Objectives

1

"Every dealer says they want better results.

We start with something bigger: better people and better experiences."

2

"Our formula is simple:

Happy agents → Happy customers → Higher profits.

Everything we build supports that."

3

"Most vendors talk about tech.

We talk about the people who use it. That's where the lift actually happens."

4

"You can't scale chaos.

You can scale process, people, and relationships.

That's our entire playbook."

2.

On Why AI Still Needs Humans

5

"AI is incredible at answering questions.

But only humans can handle context, emotion, urgency, and commitment."

6

"AI can warm the customer.

Only people can make the promise."

7

"AI is fast.

Humans are trusted.

Put the two together and you get something dealerships have never had before."

8

"Dealers don't lose deals because AI failed.

They lose deals when the handoff fails — and that's always human."

★ 3.

On Strolid as a Co-Pilot — Not a BDC

9

“A BDC takes over.

A co-pilot helps everyone get better.”

10

“Strolid isn’t here to replace your team.

We’re here to give them superpowers.”

11

“Think of us as your dealership’s co-pilot:

We guide, we support, we alert, we analyze — and we give your people the edge.”

12

“A BDC works leads.

A co-pilot works the entire store.”

—from conversations to follow-up to coaching to process.

★ 4.

On Strolid GPT → Strolid MRI (“Dealer Brain”)

13

“If Strolid GPT answered questions,

Strolid MRI answers everything.”

14

“We’re building the closest thing automotive has ever had to a dealership brain — a system that knows your store as well as your best manager.”

15

“BDC notes don’t tell the story. Conversations do.

That’s why Strolid MRI reads every interaction — and sees patterns humans can’t.”

16

“Dealers don’t need another CRM report.

They need a brain that actually understands the conversations happening in their store.”

★ 5.

On the Dealer Brain (What It Actually Means)

17

“Most decisions in the dealership are made without the full picture.

The dealer MRI changes that.”

18

“The dealer MRI doesn’t replace people — it makes every person better.”

19

“When your store can see every question, concern, objection, and opportunity across every rooftop... the game changes.”

20

"The dealer brain shows you what's happening today, not last month."

★ 6.

On the Power of Trained People & Relationships

21

"Technology doesn't build trust.

People do."

22

"The stores winning today aren't the ones with the best scripts — they're the ones with the best relationships."

23

"You can train process.

You can't train sincerity. That's why we hire differently."

24

"We built this company on one belief:

If you take care of your people, they'll take care of your customers."

25

"Our agents don't sound like call center reps.

They sound like someone you'd actually buy a car from."

★ 7.

Blending All Themes Together (Perfect Teaser Lines)

26

"AI gives you information.

Humans give you connection.

Strolid gives you both."

27

"What we're building isn't a tool — it's a relationship engine."

28

"Every dealership has data.

We turn that data into decisions."

29

"Dealers don't need 'more automation.'

They need better timing, better people, and better conversations."

30

"Strolid started as a BDC.

It's becoming something much different — and much more valuable." The Automotive Copilot
